Session: 2020-2021 | Percentage: 96%

Matriculation (CBSE) | St. Josephs Convent Sec. School, Pathankot
Session: 2018-2019 | Percentage: 91.6%

TRAINING & PROJECTS

Cloud application for early detection of cardiovascular disease | Developer | 2024
- In this project, a cloud-based trained model was developed to detect whether a patient had or was at risk of developing cardiovascular disease. Utilizing predictive analytics and machine learning algorithms, the model accurately identified potential heart issues. This aids in early detection and proactive healthcare management, providing reliable risk assessments and supporting healthcare providers in making informed decisions.

Personal Portfolio Website | DEVELOPER | 2023
- A portfolio website showcasing my projects and contact information. The website consist of sections for "About Me", "Projects", and "Contact Me", accessible through a navigation menu.

Abiltex – Skill exchange website promoting battar system | Frontend Developer | 2023
- Abiltex was a skill exchange website designed to promote the barter system for sharing skills. It facilitated the exchange of knowledge between individuals, fostering mutual growth and development. The platform encouraged users to connect and collaborate, enhancing their skill sets through reciprocal learning.

Personal Cloud with raspberry pi | Developer | 2023
- Our team developed a personal cloud using a Raspberry Pi. We configured the Raspberry Pi to serve as our own cloud storage solution, enhancing data accessibility, data security, and personal data management.

Chatbot for special people | Developer | 2021
- In this project, an intelligent chatbot was developed for individuals with disabilities, enhancing accessibility on a PC. Powered by Python and AIML, it analyzed spoken input to offer tailored assistance, showcasing expertise in NLP and assistive technology.
